

## Parents Needed!

# Study on Improving Cognitive Effectiveness for Kids with OCD

### You May Qualify If You

- Are a parent
- Have a child diagnosed with obsessive-compulsive disorder (OCD)
- Your child is 7-17 years old
- English is your primary language
- Reside in the USA

### Potential Benefits

The Treatment and Assessment of Cognitive Effectiveness (TRACE) Lab at Alliant is interested in understanding how cognitive skills can be **impaired** and **repaired**.

*Your participation can help us reach our goal to better serve people with mental health conditions like OCD!*

### Participation Involves

- A one-time online questionnaire
- A one-time Zoom session lasting approximately 90 minutes.

### Compensation

- Parents who complete an online questionnaire (link below!) will be awarded one entry into a drawing for \$150 gift card
- Parents who are eligible for and complete the Zoom session will receive a \$25 gift card

For more information, please contact Alyssa Roth at [aroth2@alliant.edu](mailto:aroth2@alliant.edu) and mention interest in the Neurocognition study. Link provided here: [https://alliant.qualtrics.com/jfe/form/SV\\_40jLemSf6Os4IC2](https://alliant.qualtrics.com/jfe/form/SV_40jLemSf6Os4IC2)
